Disabled Persons Equipment & Services.

Pedal Extensions

Designed & Manufactured
to suit the individual
requirements of the driver.

With our engineering background, we are in the unique position of being able to cover the five basic requirements for this type of work ‘in house’.

1. DESIGN – Meeting the requirements of the individual, yet staying within the legislative guidelines.
2. DRAFTING – Engineering Plans, Reports & Correspondence.
3. MANUFACTURE - Full engineering workshop facilities.
4. INSTALLATION – Fitment of relevant componentry and/or equipment.
5. APPROVAL – Liaise with Queensland Transport re: State & Federal requirements, fitment of Modification Plate and issue of ‘Certificate of Modification’ for the work carried out, if required.
